# THE POLITICAL SCIENCE NETWORK

CONNECTIONS AMONG SCHOLARS  
AT THE APSA ANNUAL MEETING

## 1. **The Network**

APSA conference  
participation from  
2002 to 2013

## 2. **Communities:**

What are the  
communities, and  
how separated are  
they?

3. **Centrality:** Who is  
central in our  
network? Why?

# MOTIVATION

**Navel gazing:** Who are we?

**Understanding the discipline:** How does our national meeting work? What are the contours of the subfields?

**Check on our methods:** When we use these tools to look at ourselves, do we believe what we find? Should that change how we think about other applications?

# THE DATA

## **APSA:** Panel Data for 2002 to 2013

- Every presentation — participants and panels
- 18,722 unique participants
- 10,229 unique panels
- Drop poster sessions, short courses, working groups, business meetings and other non-academic events

## **MPSA:** Same for 2010 to 2013

- Yet to be analyzed
- Hold back for verification

Thanks to Steven Smith and Richard Houston at APSA and Will Morgan and Rommel Acebedo at MPSA.

# APSA 2013

- SCHOLAR
- PANEL

INCLUDES ALL  
SCHOLARLY PANELS.

DOES NOT INCLUDE  
WORKING GROUPS,  
SHORT COURSES, OR  
BUSINESS MEETINGS

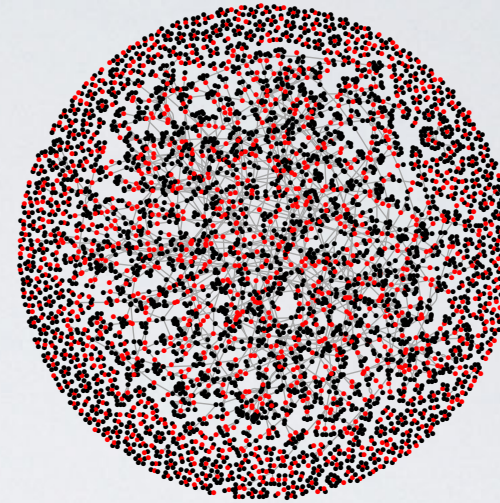

# CONFERENCE NETWORKS

Boston 2002

Philadelphia 2003

Chicago 2004

Washington 2005

Philadelphia 2006

Chicago 2007

Boston 2008

Chicago 2013

# APSA 2002-2013

● SCHOLAR  
● PANEL

INCLUDES ALL  
SCHOLARLY PANELS.

DOES NOT INCLUDE  
WORKING GROUPS,  
SHORT COURSES, OR  
BUSINESS MEETINGS

# SCHOLAR TO SCHOLAR

ONE-MODE  
PROJECTION OF  
BIPARTITE GRAPH

INCLUDES ALL  
SCHOLARLY PANELS.

DOES NOT INCLUDE  
WORKING GROUPS,  
SHORT COURSES, OR  
BUSINESS MEETINGS

# INSTITUTIONAL AFFILIATION

- TOP 10
- TOP 25
- ALL OTHERS

ONE-MODE PROJECTION OF  
BIPARTITE GRAPH

USN&WR RANK OF HIGHEST  
RANKING INSTITUTION THE  
SCHOLAR WAS AFFILIATED WITH  
DURING THIS PERIOD.

# NETWORKERS

- **NETWORKER**

ONE-MODE PROJECTION OF  
BIPARTITE GRAPH

OTHER NODES NOT DEPICTED.

NETWORKERS ARE THOSE WHO HAVE  
EVER PRESENTED ON A NETWORKS  
SECTION (SECTION 50) PANEL

# COMMUNITY DETECTION

# MODULARITY

By Rank: **0.059**

By Section: **0.210**

(BASED ON WHICH SECTION EACH  
SCHOLAR PRESENTS IN MOST FREQUENTLY.)

By Field: **0.274**

(BASED ON A RECODE OF SECTION)

# COMMUNITY DETECTION

By Rank: **0.059**

By Section: **0.210**

By Field: **0.274**

**Fastgreedy algorithm**

Maximizes modularity

- 50 communities
- 8 larger than 150 members.

By Communities: **0.535**

# COMMUNITIES

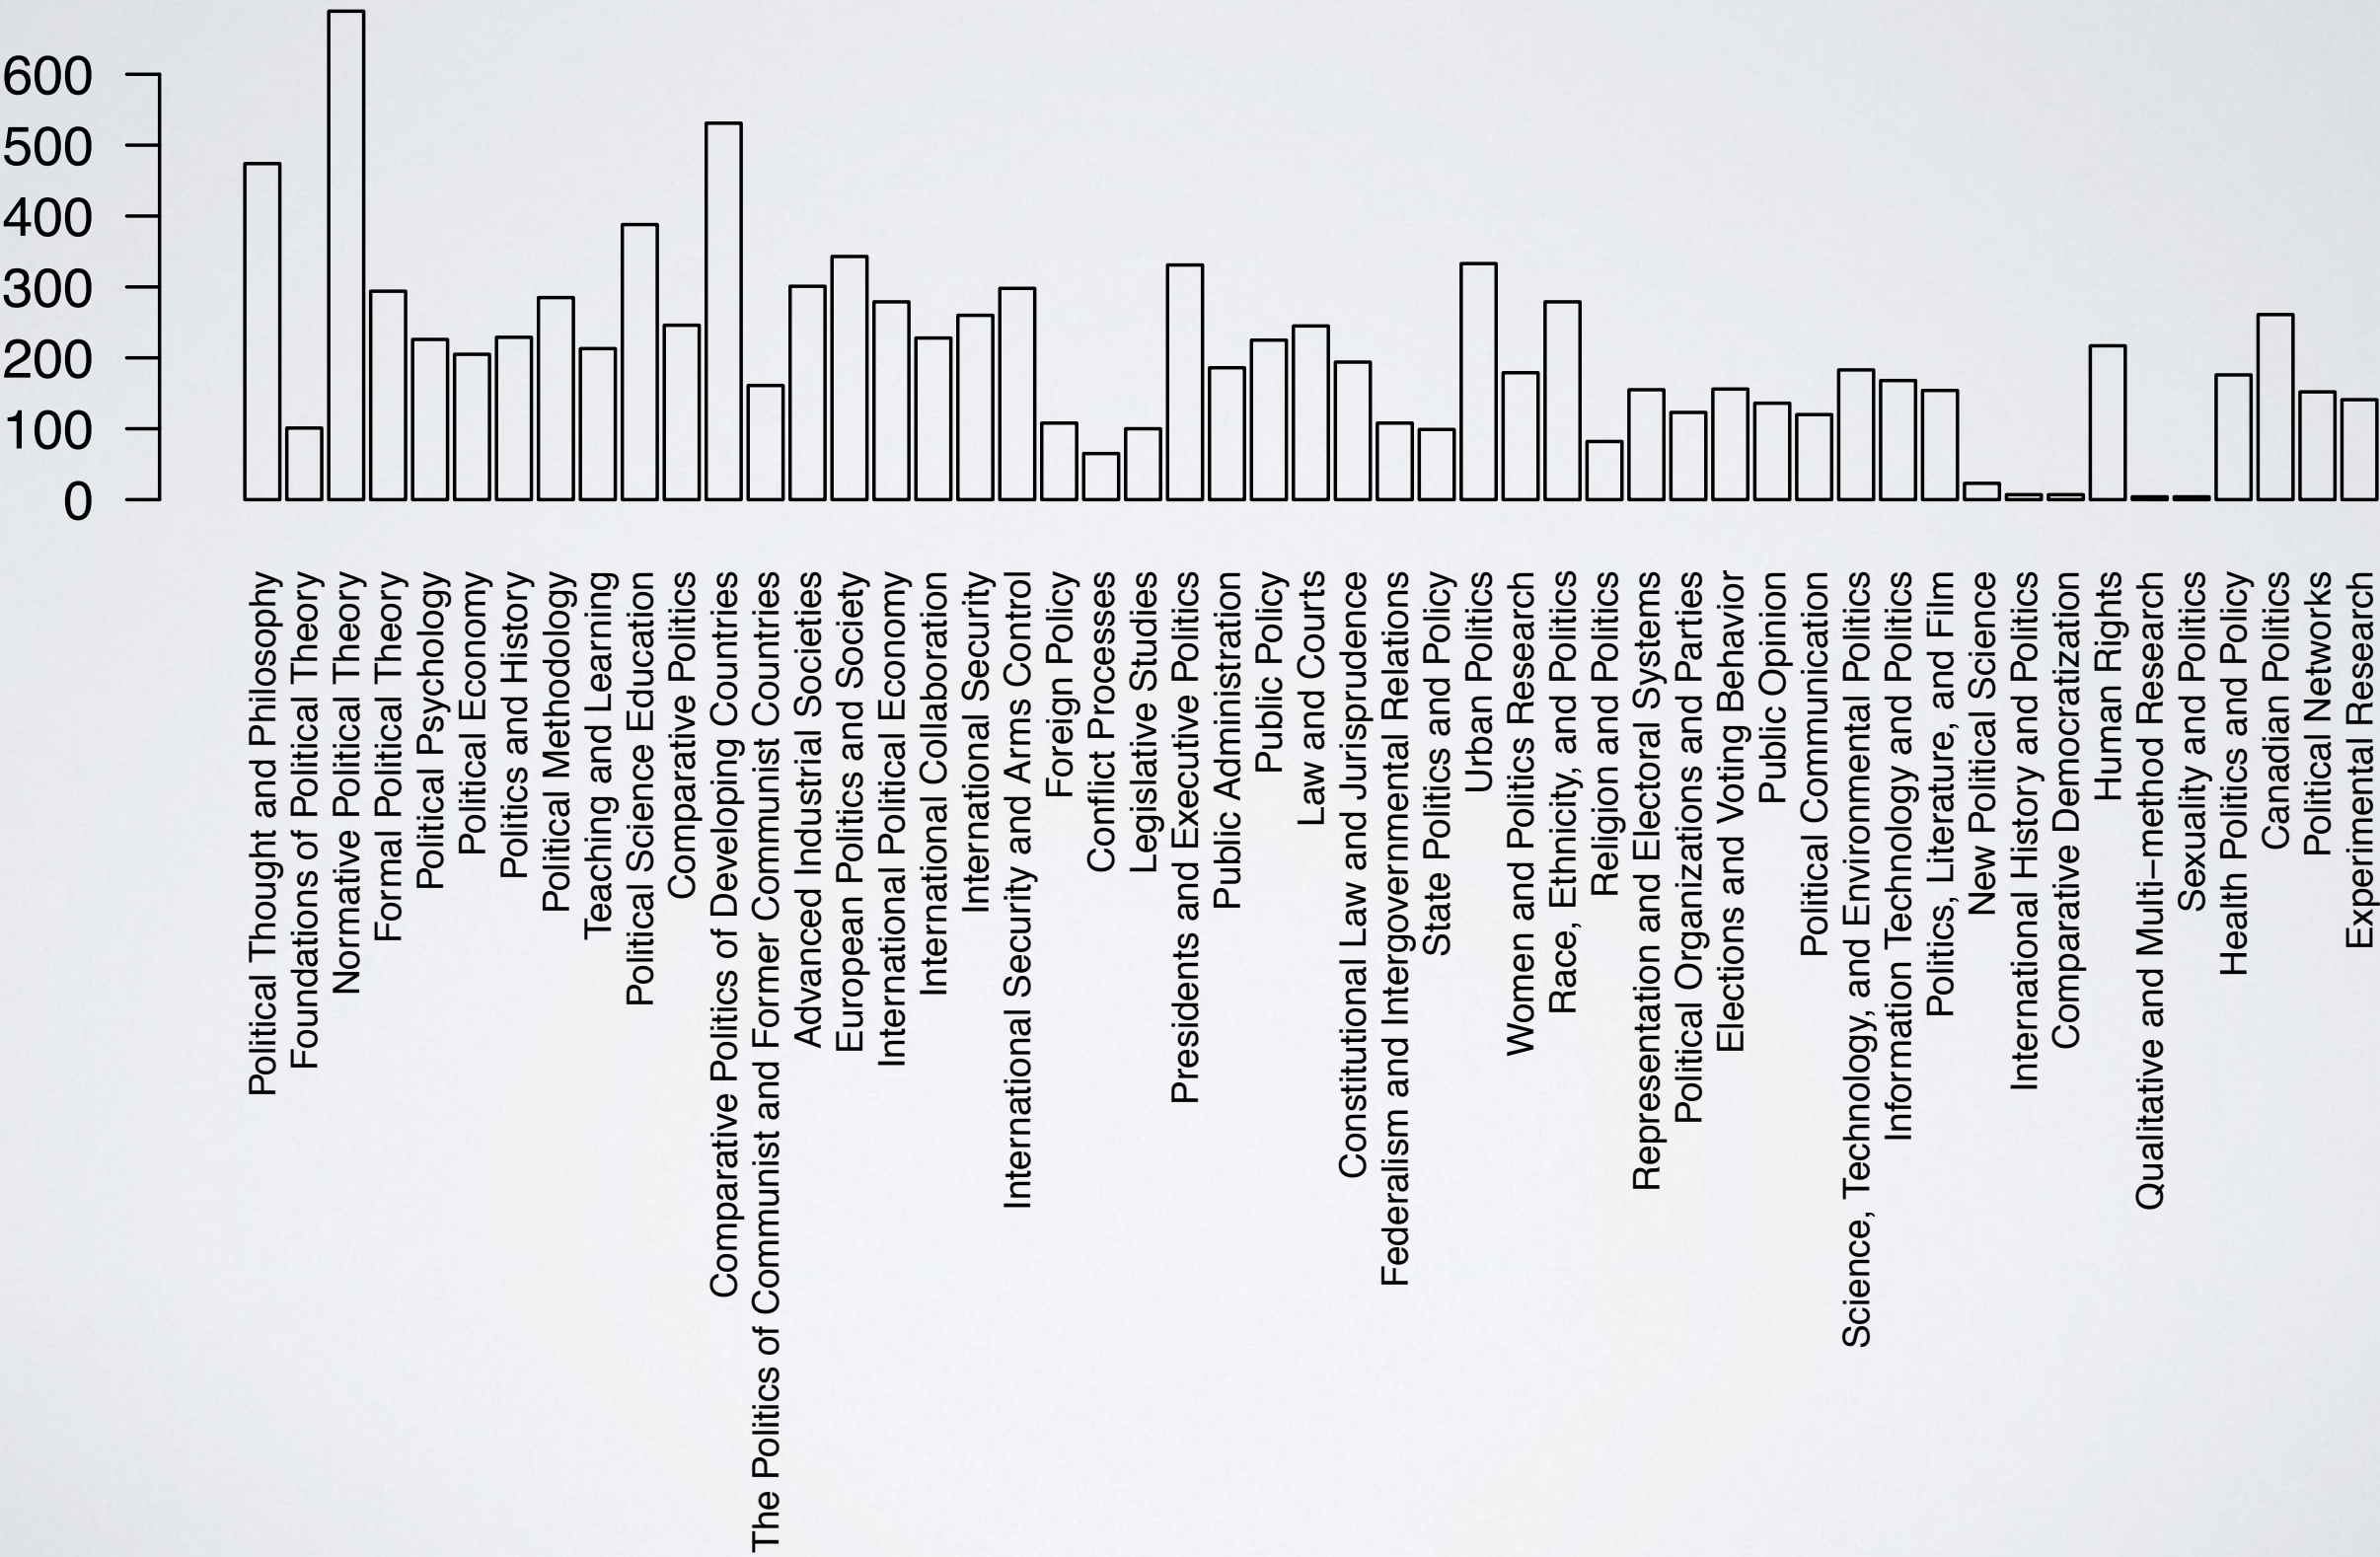

ONE-MODE PROJECTION OF  
BIPARTITE GRAPH

COMMUNITIES AS DETECTED BY THE  
FASTGREEDY ALGORITHM, WHICH  
MAXIMIZES MODULARITY.

NUMBER OF SCHOLARS WHOSE MOST COMMON SECTION IS...

# Political Theory
